

CrossOver Plugin™ allows you to run many Windows plugins under Linux, without needing a Microsoft operating system license. CrossOver Plugin includes an easy to use, single click interface, which makes installing Windows plugins simple and fast.

CrossOver Plugin works on any x86 based Linux distribution and will integrate with most browsers including Netscape® 4.x, Netscape 6.x, Konqueror®, Mozilla®, Galeon® and Opera®. CrossOver also integrates with Gnome® and KDE® to let you transparently open any Microsoft Word®, Excel® or PowerPoint® file. But even better, you can open these attachment types directly from any mail client—no more hassles saving files to disc first; just click and run!

## the Best of Windows for Linux

**Runs on Any Linux Distribution**  
CrossOver products run on any x86 Linux distribution. Tested on Red Hat, SuSE, Mandrake, Debian, and Xandros.

### Native Compatibility

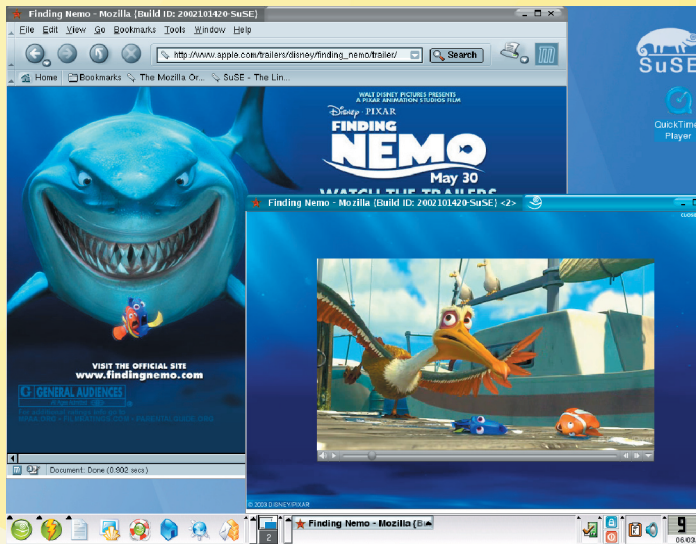

Because CrossOver uses the native Windows plugins, you get the best compatibility possible. For instance, this is the only 'QuickTime on Linux' solution that supports the Sorenson movie format used by most sites.

### Easy Windows Installer

Install Windows software under Linux quickly and easily. You use your normal Windows installation CDs — CrossOver handles configuring your programs to run under Linux.

### Superior Support

When you buy CrossOver Plugin, you're entitled to 6 months support from CodeWeavers' well-respected

Watch Quicktime movie trailers under Linux!

support team. Not only that, but you also receive 6 months of free product upgrades as well. Volume licenses receive 1 year of both support and upgrades.

### Supported Plugins

CrossOver Plugin is capable of running a wide range of Windows plugins, including:

- QuickTime®
- ShockWave Director®
- Windows Media Player 6.4®
- Word Viewer®
- Excel Viewer®
- PowerPoint Viewer®
- and more...

The only Linux browser product that lets you run Quicktime!
